- Adobe XD
- Photoshop
- Canva
- Visual Studio
- XAMPP
- MS Office
- Git
- GitHub

## LANGUAGES

- English
- Hindi
- Marathi

## PROJECTS

**" Smart Eye "** | Standalone Windows Applicatioon

SMART EYE is a Python-based system that monitors and manages vehicles through comprehensive features like counting, speed detection, classification, and number plate detection, offering safety and data-driven insights across various sectors, including traffic, law enforcement, and transportation. *(Python)*

**" Your Acrticle "** | Web Based Application

Your Article is web based application that enables users to share their ideas through articles submitted easily via a form. The administrator, notified via Gmail, selects and publishes the top five, ensuring high-quality content and motivating users to submit their best work. It fosters participation and promotes excellence in a streamlined process. *(HTML, CSS, JS, PHP)*

**" Parking Management System "** | Web Based Application

It is a web-based parking management system designed to save customers time and simplify the parking experience. It allows users to conveniently reserve parking spaces and view real-time availability, ensuring a hassle-free parking experience. *(HTML, CSS, JS, PHP)*

**" Movie Seat Booking "** | Web Based Application

This web-based movie seat booking system lets customers conveniently choose and book seats anytime, anywhere. Features include comprehensive movie information, user-friendly booking interface, seat selection and management tools, and seamless reservation experience. This platform streamlines the booking process, reducing customer wait times and enhancing overall movie theater convenience. *(HTML, CSS, JS)*

## ACHIVEMENTS & AWARDS

- **TECH EXPO -2023** National Level Project Competition
- **GOOGLE CLOUD** - Study Jam Campaign
